What is *MprinT* ?

- *MprinT* secures ID with micro text only readable with 10X magnification.

- *MprinT* protects ID from reproduction by copier and scanner.

- *MprinT* prevents alternation of original ID content .

How it works ?

89ABC61

0123456789ABC61

0123456789ABC-6-1

Micro Text

Micro text is patchy on photocopied
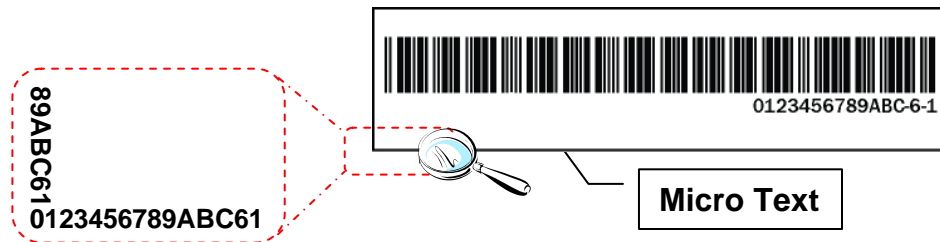

- Original document shows barcode is embedded with MprinT security. Detail of micro text shows under 10X magnification.

- Micro text links with the document barcode content.

- Photocopied document shows micro text patchy and loss of detail.

Sign by James Lee
Vice Chancellor

LLORJAMESLEEVICECHANC
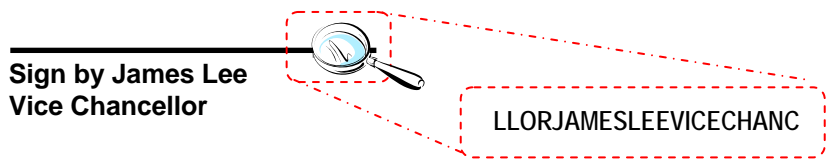

- Micro text links with document name and conceal as signatory line.

Features of *MprinT*

MprinT – Make Reproduction Intricate.

- **Security** – *MprinT* generates micro text and dynamically link to some document content such as name, identification number and date. This enhance the ID security and prevent alternation of the document content.

- **Aesthetic** – *MprinT* transforms micro text into aesthetic design such as line, box or border to enhance the overall document layout and make fraud challenging.

- **Efficiency** – *MprinT* is proven effective and the technology is widely used in currency notes. It is cost effective which require no expensive device to validate the micro text.
